

*"Aprime Provideo et Contego Spatium"*

# Air Force Space Safety

Above all - Provide for and Protect Space

## Vision:

A professional, space-savvy action arm of the AF Safety Center dedicated to a safe, combat-ready space domain

## Mission:

Safeguard Combat Space Power via Mishap Prevention

Air Force Space Safety's mission is to preserve combat space-power by anticipating, reducing, and preventing mishaps. We develop, execute, and evaluate Air Force space mishap prevention programs and execute Interagency Nuclear Safety Review Panel responsibilities on behalf of the Department of Defense.

We promote safety awareness and mishap prevention with DoD, Civil, Commercial, Academic, and our International partners, the Space Safety Council, and media programs. We oversee mishaps investigations, conduct evaluations, and ensure application of corrective actions and mishap inclusion to the Air Force Safety Automated System.

## Focus Areas:

Global Advocate for Space Safety Standards

Ensure our actions bring credit upon Space Safety, the Air Force, and the United States

Enculturate the space professional and evolve codification

Communicate with the warfighter to increase space mission success

Safeguard the Space domain

Inculcating premise:  
Space Safety is a Mission Enabler

Prevent Space Mishaps

Investigate space mishaps

*Staying the Course @ 18,000 mph*

Provide Guidance, Oversight, Policy, Programs, and Training to the Space Professional
